RE: MicroTech Systems Letter of Support

To Whom It May Concern:

The Economic Development Council of St. Lucie County contracted MicroTech Systems in May of 2007 to build our computer network from the ground up for our new office location. Their firm handled every aspect of our organization's technical needs. A sample of these needs include installing the low voltage data network, designing and implementing our computer network and now providing the after support when needed. They also manage our in-house Exchange mail-server and oversee our daily data back up.

We also commissioned MicroTech to design and build our website, www.YourEDC.com. It was very important that the new website meet or exceed the high expectations and needs of prospective companies that we are trying to attract to St. Lucie County. We are very happy with the outcome of the project; the new website has received many compliments and has proven to be a great resource for our community.

We have been very pleased with the overall service and response time that Bryan Gardner and his team have provided for us; MicroTech has always responded and handled any issues in a timely manner. We look forward to continuing our relationship with MicroTech and for this reason we are happy to show our support by recommending their firm to our members as well as other businesses and organizations.

Sincerely,

Larry Pelton
President
