To Whom It May Concern:

Gem Builders hired MicroTech to redesign our company's website in the summer of 2006. MicroTech also created our companies new logo. We felt we needed a website and logo that would more accurately represent the quality homes that our company produces.

Our new website, www.gembuilder.com, showcases all of our different models, floor plans and their relative specifications. The new company logo that MicroTech created became the centerpiece of the website as well as all of the rest of our marketing materials.

Bryan and his team were a pleasure to work with and I would definitely work with them again on any similar projects that may come up in the future. If you have any further questions, please feel to contact me.

Regards,

Shane Barber,
Vice President
